WORK EXPERIENCE

HRMS / UI/UX Designer

Tech Tammina | 2025 – Present

- Designed intuitive and responsive user interfaces for Attendance, Leave Management, Pre-Onboarding, and Payroll modules for both Admin and Employee users.
- Created user flows, wireframes, high-fidelity UI designs, and interactive prototypes in Figma, ensuring consistency through reusable design components.
- Collaborated with product managers and developers to translate business requirements into user-centered, pixel-perfect interfaces and supported developer handoff.
- Improved usability by simplifying complex HR workflows while maintaining a scalable design system and responsive design across the application.

PROJECTS

AI-Powered Indian Stock Market Analyzer

June 2026

- Designed an AI-powered stock analysis platform with intuitive fintech dashboards and AI-driven insights.
- Created user flows, wireframes, high-fidelity UI, and a scalable design system.
- Designed AI features for Buy/Hold/Sell recommendations, risk analysis, and portfolio tracking.
- Built responsive, accessible interfaces with interactive data visualizations and micro-interactions.

iMobile Pay's Transaction Filtering

January 2025

- Conducted user research to identify pain points in transaction tracking and filtering.
- Designed and tested enhanced filtering system for up to 6 months of transaction history.
- Integrated EMI conversion and optimized reward points UI for improved task completion and user satisfaction.
- Created a responsive UI that maintains clarity on small mobile screens, ensuring that complex financial data remains legible and accessible.
